

Viacheslav Androsov

Frontend Developer (React / Vue / TypeScript)

Open to remote work

bandrone.man@gmail.com · t.me/awaitMeBro · portfolio

SUMMARY

Frontend developer with **4+ years of commercial experience** in **Vue 3, React and TypeScript**. I design frontend architecture, untangle legacy code and fix performance bottlenecks. **Full-stack experience with Node.js**. I use Claude Code and AI agents every day.

CORE SKILLS

Frontend: TypeScript, React, React Native, Vue 3, Next.js, Zustand, Pinia, Redux Toolkit, TanStack Query

UI / Styling: Tailwind CSS, shadcn/ui, SCSS, Storybook

Quality / Tooling: Vite, Zod, OpenAPI, MSW, Vitest, Jest, Playwright, FSD, CI/CD, Git

Web3: ethers.js, web3.js, MetaMask, WalletConnect

AI: Claude Code, agentic pipelines, MCP

WORK EXPERIENCE

Syncra — Frontend Developer (Vue)

Apr 2025 — present

B2B payment gateway handling ~40k payments a day. Team: 2 frontend and 3 backend devs, a BA, QA, a lead. Scrum.

- Traced a **payment form crash on older Android devices** via Sentry and shipped a legacy-browser build — **Android checkout conversion rose from ~62% to ~81%**.
- Took the process editor **from ~25 to a steady 60 FPS** on diagrams with 100+ blocks.
- Built a **reusable TanStack Table data grid** used across 20+ pages, with live status updates over WebSocket — **500+ transactions refresh without dropped frames**.
- Designed **undo/redo for the whole editor — 40+ operation types**.

Stack: *Vue 3, TypeScript, Pinia, TanStack Query / Table, Zod, shadcn-vue, Tailwind CSS, WebSocket, Sentry, Vitest.*

MGS LLC — Frontend Developer (React, React Native)

Mar 2024 — Apr 2025

Property management platform. Team of ~10: 3 web frontend devs, me on mobile, 3–4 backend devs, a designer, QA and a PM. Scrum.

- **Built a React Native app from scratch** for residents and staff: requests, payments, documents, push notifications.
- Introduced **typed API client generation from OpenAPI (Orval)**, ending manual type syncing with the backend.

Stack: *React, React Native (Expo), TypeScript, Zustand, TanStack Query, React Hook Form, CASL, OpenAPI, MSW.*

BabyDoge — Frontend Developer

Jun 2022 — Feb 2024

Web3 ecosystem on BNB Chain: a DEX, an NFT platform and GameFi projects — babydoge.com. Team: 2–3 frontend devs, backend and smart contract devs, a designer and a PM. Kanban.

- Joined as a junior and within six months **owned the wallet, swap and portfolio modules**.
- Integrated **MetaMask and WalletConnect** via ethers.js: wallet-signature sign-in, network switching and transaction status that survives a reload.

Stack: *Vue 3, TypeScript, Pinia / Vuex, TanStack Query, Vite, Tailwind CSS, ethers.js, web3.js, WalletConnect.*

PROJECTS

FoodIQ — Lead Frontend

foodiq.space

AI nutrition tracker: calories and macros from a meal described in plain text. Team: me, a backend dev and an analyst.

- Set up **contract-first development with OpenAPI**: **120+ endpoints**, frontend and backend built in parallel.
- **Cut the initial bundle in half, from 2.1 MB to 1 MB**.

Stack: *Next.js 16, React 19, React Native (Expo), TypeScript, TanStack Query, Zustand, Tailwind CSS.*

EDUCATION

Siberian Federal University, 2014
